PERSONAL STATEMENT

A University of Auckland Master of IT graduate with hands-on experience across full-stack development, cloud architecture, and AI integration. My background spans web and software development, complemented by over three years in online marketing, B2B sales and market development. I combine tech stack with client-facing skills, making me equally effective building solutions and communicating their value to broader audiences.

EDUCATION

University of Auckland

Master of Information Technology GPA: 8.35/9

Auckland, New Zealand

Feb 2024 - Dec 2025

Relevant courses: Programming with Web Technologies, Programming for Industry, Cloud Computing Architecture, Advanced Topics in AI, Advanced Topics in Database Systems, Software Tools and Techniques, Health Data Analytics

Nanjing University

Bachelor of Philosophy GPA: 7.56/9

Focus on logic, critical thinking, and analytical reasoning.

Nanjing, China

Sep 2017 - Jul 2021

SKILLS

Front-end: Angular, React, Svelte, TypeScript, JavaScript, HTML/CSS

Back-end and Database: Python, Java, SQL, MongoDB, Docker, Node.js

AI & Cloud: AWS Bedrock, AWS Architecture Solutions, LLM Integration

Design & Productivity: Figma, Canva, Adobe Photoshop, Microsoft Office 365, Apple iWork

Languages: English (professional), Mandarin Chinese (native)

PROJECT EXPERIENCE

AWS AI Innovation Challenge — 1st Place

University of Auckland × AWS New Zealand

Jul 2025 - Nov 2025

- Led a team to build a cloud-native, AI-powered insurance claims processing platform for a local insurance provider (SafeGuardNZ) — selected as the 2025 Semester Two Challenge winner for UoA × AWS internship. Presented the project at AWS Auckland offices to separate audiences including AWS engineers and business stakeholders.
- Architected the multi-layer AI system combining Amazon Textract (document OCR), Amazon Bedrock (LLM reasoning), and custom ML models for financial data extraction with confidence

scoring. Built the Node.js/Express backend and REST API layer, integrating MongoDB Atlas, AWS Cognito for auth, and AWS Amplify for deployment.

- Delivered real-time document processing, intelligent auto-population of claim forms, an administrative dashboard, and an AI-powered customer support chatbot.

WORK EXPERIENCE

Specialized Bike Components New Zealand

Auckland, New Zealand

Ride Consultant

Jul 2025 - Present

- Provide expert consultations and premium sales service for one of the world's leading cycling brands.
- Assemble, tune, repair and maintain bikes and bike parts.
- Manage workshop scheduling, parts ordering, inventory, and day-to-day retail operations.
- Build strong customer engagement through clear communication, technical knowledge, and follow-through.

Specialized Bike Components (Shanghai) Co., Ltd.

Shanghai, China

Market Development Specialist

Mar 2021 - Sep 2023

- Managed B2B sales relationships with business clients, dealers, and partners across the Chinese market over 2.5 years.
- Consistently achieved sales targets while coordinating with internal teams on fulfilment, logistics, and account management.
- Developed and implemented retail strategies during and after the pandemic bike market boom, improving product mix and inventory turnover.
- Drove adoption of Shopify-based retail platform among customer and dealer accounts, supporting partners through onboarding, storefront localisation (specialized.com), and aligning online product catalogues with in-store availability.
